To Whom It May Concern:

The Mound Bayou School District is very pleased with the services that we received over the school year with Empowerment 360. The consultant Dr. Montrell Greene spoke to our students and faculty and did a tremendous job. We are a school district that cares about the quality of education for our students. Dr. Greene focused on ways to get students motivated to do better in school not just for the overall district level but for their personal educational goals. Through role-play, music, and speeches, based on tools from the Empowerment motivational sessions, Dr. Greene was able to reach students on a level that we feel not only inspired them but motivated them to perform their very best this school year and to stay in school.

Our faculty seemed to enjoy having a break from the norm with staff development. The Empowerment 360 staff development sessions were informative and kept the attention of the overall staff which has a direct affect on student service.

Sincerely,

A handwritten signature in blue ink that reads "William Crockett". The signature is written in a cursive style with a large initial "W".

William Crockett, Superintendent  
Mound Bayou School District
