To Whom It May Concern

The Noxubee County School District has utilized the services of Empowerment 360 throughout the school year 2008-2009. The consultants Dr. Montrell Greene and Windell Greene came into our district and performed a series of parental meetings and student motivational meetings.

Each Empowerment motivational session focused on dropout prevention, goal-setting, and student achievement. The students gained insight and perspective on educational issues that concern them. Every session was designed for them to understand and even to participate in some instances. Our students really benefited from the series of presentations.

Each parent meeting delivered practical and creative ways parents could become more involved in their children's education. The sessions were crafted to bring a hands-on approach that we believed resonated with our parental crowds.

The staff development was wonderful. Our teachers and administrators commented on how the sessions were useful and interesting.

Sincerely,

Dr. Kevin Jones, Ed. D.
Superintendent of Education
